KRI 1
IODOFORM PASTE

DESCRIPTION
Iodoform paste for dental use.

PROPERTIES
• Used in paedodontics for its creative properties
• Neither hampers the evolution of tooth bud nor the eruption of permanent dentition
• Resorbable
• Biocompatible
• Radiopaque

INDICATIONS
Treatment and obturation of infected canals of deciduous teeth.

CONTRA-INDICATIONS
Do not use in children under 30 months (2 ½ years) of age.

DIRECTIONS FOR USE
After usual treatment designed to remove carious dentine and necroseal tissue, fill the root canal with paste and then cover with a temporary cement.

PRECAUTIONS
Products contains iodoform – possibility of allergic reaction to patients who are sensitive to iodine.
